

Network Engineer (m/f)

We are expanding our team in Brunswick / Hannover and are therefore looking for a Network Engineer (m/f) in full-time or as a freelancer.

The vacant job is to be filled as soon as possible.

KEY RESPONSIBILITIES:

- Close collaboration with internal and external employees of our clients for the implementation of network projects
- Configuration, operation and troubleshooting of network components
- Organisation, optimisation and development of the network infrastructure
- Creation and drafting of technical concepts and documentations

YOUR PROFILE:

- Fundamental knowledge of basic network principals
- Preferable special knowledge in one or more of the following subject areas: routing, switching, WAN, firewalls, load balancer, WAN-optimisation, wireless LAN and Data Centre
- Ideally experience with Cisco, Check Point, F5 or Riverbed
- Appropriate IT-certificates are of advantage
- Independent, responsible, structured and solution-oriented working method
- Flexible, team player customer-orientated
- Good German and English skills - orally and in written

WE CAN OFFER YOU:

- Flat communication structures
- Support, coaching and further development by our experts and certified trainers
- Demanding tasks and interesting challenges in a young and growing company
- Autonomous work and a cooperation between colleagues in a highly motivated team

Even if you cannot meet all the requirements, applying may be promising:

The lack of knowledge can be taught and developed in practical work assignments.
